

JOB DESCRIPTION

Job Title: Full Stack .Net Developer

Reports To: Team Lead

Salary and Benefits: 80K – 150K (Depending on experience)

Location: Abbottabad (Office Based)

Duration: Long term

Job Overview:

As a Full Stack Developer, you will be responsible for implementing visual elements that are visible from the computer user's vantage point within a web application. You will be responsible for the translation of UI/UX design wireframes to actual code. There are times you will be expected to work independently to meet tight deadlines following design guidelines. You will be responsible for creating WebApp and Web API. Your primary focus will be development of all server-side logic, definition and maintenance of the central database, cloud hosting, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for enabling the front-end elements integration built by your coworkers into the application.

Responsibilities:

- Create and test software prototypes.
- Develop rich user interfaces and implement frontend logic and validation.
- Bridge the gap between graphic design and technical implementation and Translate UI/UX design wireframes to actual code
- Optimize webpage performance.
- Coordinate with other software professionals and developers
- Build reusable code and libraries for future use
- Create backend for Web Apps and Mobile Apps.
- Implementation of authorization, authentication, server security and data protection.
- App deployment and hosting services management.
- Integrating with different services' APIs, such as multimedia streaming, couriers, payment gateways, etc.
- Building reusable code and libraries for future use.
- Optimization of the application and hosting settings for maximum speed and scalability.
- Design and implementation of data storage solutions.

Essential / Desirable Skills:

- Experience in ASP.NET MVC5 and/or ASP.NET Core
- Experience in WebAPI design and development, RESTful design
- Experience with SQL Server database development using T-SQL, knows the basic of query optimization and performance tuning.

- Experience in Vue, Angular or similar frameworks.
- User authentication and authorization between multiple systems, servers, and environments
- Experience in Azure or AWS.
- Understanding of Agile methodologies, work experience on GitHub/DevOps
- Experience in CI/CD
- Management of hosting environment, including database administration and scaling an application to support load changes.
- Setup and administration of backups
- Experience in automated testing platforms and unit tests
- Experience in HTML, CSS (knowledge of LESS and SASS), and JavaScript (jQuery)
- Experience in responsive design (Bootstrap or similar toolkit)
- Experience in Vue, Angular or similar frameworks. Preferably Vue.
- Experience in .Net core and MVC 5 frontend.
- Experience in creating reports and charts.
- Familiarity with SQL Server.
- Understanding of Agile methodologies, work experience on GitHub/DevOps
- Experience working with RESTful JSON APIs
- Ability to optimize webpage page performance from frontend point of view, loading JavaScript libraries, images, media, and CSS files.
- Knowledge in front-end vulnerabilities and security.

Qualifications:

- BCS (Computer Science) or BSE (Software Engineering) from a recognized university.
- 3 - 5 Years of relevant full-time experience in web apps development.
- Communication and team work skills should be present.
- Should have the urge to try out new technologies related to .Net.

Key Performance Indicators:

Provide quantifiable measures that are used to evaluate the success of the employee on this specific role.
